Essential risk management practices:

1. Stop-loss orders: Always define exit points before entering a trade.
2. Position sizing: Never risk more than a small percentage of your capital on a single trade (commonly 1-2%).
3. Risk-reward ratio: Aim for trades where potential profit outweighs potential loss by at least 2:1.
4. Trade journaling: Record all trades to analyze performance and improve strategies.
5. Stay disciplined: Avoid chasing losses or deviating from your plan.

Developing a Short Term Trading Plan

A structured trading plan is key to success:

3. Set exit rules: When will you close your trades—profit targets or stop-loss levels?
4. Determine position sizes: Based on your risk tolerance and account size.
5. Schedule your trading hours: Be aware of market openings, closings, and key news releases.
6. Review and adapt: Regularly analyze your trades and refine your approach.

Final Tips for Success in Short Term Stock Trading

1. Start small: Begin with a demo account or small position sizes to build experience.
2. Stay informed: Follow market news, earnings

reports, and economic data.
3. Be patient: Wait for high-probability setups rather than forcing trades.
4. Maintain emotional control: Keep discipline and avoid impulsive decisions.
5. Continuously learn: Study market behavior, refine your strategies, and adapt to changing conditions.
