The Role of Traffic Cameras in Providence RI

What Are Traffic Cameras and How Do They Work?

Traffic cameras are surveillance devices installed at strategic locations across the city's road network. They capture live footage or images of traffic conditions, which can be accessed by traffic management centers, law enforcement, and sometimes the public. These cameras typically operate 24/7, providing continuous monitoring.

The primary functions include:

3. Data Collection: Gathering traffic data for planning, analysis, and historical record-keeping.
4. Public Information: Some systems display live feeds or traffic updates for drivers via websites or apps.

Providence's traffic cameras are usually connected to a centralized traffic management system operated by the Rhode Island Department of Transportation (RIDOT) or the Providence Department of Transportation.
