This is one of the most straightforward and cost-effective solutions.

1. **How it works:** Adhesive or screw-mounted plastic channels run along the wall, hiding cables inside.
2. **Pros:** Easy to install, removable, and paintable to match wall color.
3. **Cons:** Visible from the side if not painted or installed carefully.

Steps to install cable raceways:

1. Measure the length needed from the TV to the outlet or power source.

2. Cut the raceway to size if necessary.
3. Attach the raceway to the wall using adhesive backing or screws.
4. Run the cables inside the raceway.
5. Cover the raceway with the lid and secure it.
6. Paint the raceway to match the wall if desired.

2. Conceal Wires Behind the Wall

For a truly clean look, hiding wires behind drywall is the best option, though it involves more effort.

In-wall cable management kit

- Use an in-wall rated cable management system designed for electrical wiring. - Allows you to run cables through the wall, out of sight.

Steps to conceal wires behind the wall:

1. Turn off power and unplug devices.
2. Mark the spots where you will cut holes—usually behind the TV and near the outlet.
3. Cut drywall using a drywall saw.
4. Install the in-wall cable kit following manufacturer instructions.
5. Run cables through the wall opening, connecting your devices.
6. Patch and paint over the drywall openings for a seamless finish.

Note: In-wall wiring often requires adherence to electrical codes and may necessitate hiring a professional electrician.

3. Use a TV Mount with Built-in Cable Management

Many modern wall mounts come with integrated channels or sleeves to hide cables.

1. **Advantages:** Minimal effort, no wall modifications needed.
2. **How to use:** Mount your TV using a bracket with cable management features, then run cables through the built-in channels.
